

ADDITIONAL INFORMATION FOR ONE EVENT LICENCE COMPETITORS

Your child's entry for the Super Mini MX Champs this weekend has indicated that they require a One Event Licence. Part of the conditions of this licence & your entry is that your child's machine complies with the minimum technical requirements set out in the MNZ Manual of Motorcycle Sport and that to the best of your knowledge & belief it is in safe working order and fit for competition.

As part of safety requirements a 'Bike Check' will be carried out for everyone requiring a One Event Licence. This is for the safety of your child and other competitors.

Please bring your child's machine to the area beside sign in where these checks will take place, be there as soon as possible after the commencement of sign in.

Ensure that you read the separate riders briefing prior to arriving at the event; ensuring that your child understands these as well.

In addition to the written riders briefing, a short briefing will be held at the track, going over flags, track exit, passing, starts; this is an opportunity for you to ask any further questions you may have.

What they will be checking the bike for:

Machine Examination: (MOM 6.19)
